- Client onboarding & login flow: identity verification, data entry, approval steps, security features, error handling.
- Form & payment logic validation: error messages, field validation, business rules, edge-case behaviour.
- UI/API/DB consistency checks: cross-layer data verification and defect identification.
- Azure DevOps workflow: Test Cases, Boards, Kanban collaboration.

Státní pozemkový úřad <https://www.spucr.cz/>

City: Opava | Country: Czechia | Business or sector: Agriculture, forestry and fishing

[08/2021 – Current] **GIS / Land Office Specialist — State Land Office (CZ)**

- GIS data work: parcel geometry, land consolidation, map layers, spatial data accuracy.
- Soil & environmental analysis: BPEJ, erosion, drought indicators, soil classification.
- Data consistency & validation: cross-checking map layers, geometric data and registry records.
- Landowner communication: administrative support, documentation, coordination of land adjustments.
- Technical work with geospatial datasets: reviewing, interpreting and verifying GIS inputs for official land processes.

EDUCATION AND TRAINING

[08/2018 – 05/2021]

Certified specialist - Regional policy in agriculture

Masarykova střední škola zemědělská a Vyšší odborná škola <https://www.zemedelka-opava.cz/>

Address: 74601, Opava, Czechia

Higher professional studies focused on economics, legislation, subsidy policy, public administration and rural development. The studies provided a solid foundation for work in state administration, local government, agricultural enterprises and the non-profit sector. The acquired knowledge and skills are fully usable in institutions such as the Ministry of Agriculture, SZIF (State Agricultural Intervention Fund), regional and municipal authorities, regional development agencies or control and inspection bodies.

[10/2022 – 02/2023]

PyLadies | Beginner's Python Programming Course

<https://pyladies.cz/>

Basics of programming in Python: variables, conditions, loops, functions, working with files, modules and libraries, basics of testing and creating simple applications.
